

TerraBloom™ — Planetary Soil Enhancer

10x Output for Vineyards and Apple Orchards

Product Overview:

TerraBloom™ is a fictional eco-biotechnology designed to restore Earth's soil and boost agricultural output by 10x, especially for wine grapes and apple trees.

Benefits for Vineyards:

- 10x higher grape yield
- Enhanced taste and aroma development
- Increased drought tolerance
- Stronger root formation

Benefits for Apple Orchards:

- 10x increase in apple production
- Larger, sweeter, more colorful apples
- Stronger immunity against pests and fungi
- Longer productive tree lifespan

How TerraBloom™ Works:

1. Bio-Crystal Nutrient Resonators unlock dormant soil nutrients.
2. Ecosynthetic Mycofusion Microbes deliver precise plant nutrition.
3. Atmospheric Energy Harvesters boost soil vitality.

Environmental Impact:

- Restores soil ecosystems
- Regenerates carbon levels
- Increases biodiversity
- Zero waste, biodegradable

Usage Instructions:

1. Apply evenly across soil.
2. Activate with water.
3. Allow 48 hours for stabilization.
4. Enhanced growth begins within 2–3 weeks.
