

# **AgriNova™ — Hyper-Yield BioEnergy Soil Catalyst**

**10x Output for Corn and Wheat**

## **Product Overview:**

AgriNova™ is a fictional regenerative soil biotechnology engineered to boost corn and wheat production by 10x while restoring Earth's ecosystems.

## **Benefits for Corn:**

- 10x increase in kernel yield and cob size
- Strengthened stalks for drought and wind resistance
- Enhanced chlorophyll efficiency
- Accelerated growth cycles

## **Benefits for Wheat:**

- 10x increase in grain output and stem density
- Improved gluten structure strength
- Enhanced resistance to rust, blight, and mildew
- Balanced micronutrient absorption

## **How AgriNova™ Works:**

1. Quantum Soil Resonance Nodes unlock minerals.
2. Bio-Lattice Mycelial Energizers distribute nutrients.
3. Photonic Growth Amplifiers boost photosynthesis.

## **Environmental Impact:**

- Restores soil biodiversity
- Rebuilds organic carbon levels
- Increases moisture retention
- Zero waste and biodegradable

## **Usage Instructions:**

1. Apply AgriNova™ evenly over the soil.
2. Activate with light watering or natural rain.
3. Wait 48 hours for stabilization.
4. Growth enhancement visible in 1–2 weeks.
